Hospital Sultan Abdul Aziz Shah (HSAAS), Universiti Putra Malaysia, organized the World Stroke Day 2025 Celebration

Hospital Sultan Abdul Aziz Shah (HSAAS), Universiti Putra Malaysia, organized the World Stroke Day 2025 Celebration at the HSAAS Auditorium on 29th October 2025.

The WSD 25 focused on enhancing knowledge and skills in hyperacute stroke management and stroke prevention strategies. The program was designed to reinforce clinical readiness in managing acute stroke at both the hospital and community levels.

The event was officiated by YAB Dato' Seri Dr. Wan Azizah Wan Ismail, symbolizing national support for efforts to strengthen public and professional understanding of stroke — a leading cause of disability and death worldwide that is largely preventable and treatable with early intervention.

- The event featured expert talks by neurologists, interactive sessions and forums, and health exhibitions emphasizing the importance of timely and accurate treatment to minimize neurological deficits and timely intervention.

- The celebration was supported by strategic partnerships with industry collaborators, reflecting a shared commitment to building healthcare capacity and expanding stroke advocacy in Malaysia.

- Through this initiative, HSAAS and UPM reaffirmed their dedication to advancing academic leadership and healthcare excellence in stroke care — combining knowledge, innovation, and community service to strengthen Malaysia's ongoing fight against stroke at the national level.
