## **INTRODUCTION**

The 29th Annual Scientific Meeting of the Malaysian Society of Neurosciences (MSN) was held in commemoration of the MSN 30th Anniversary, in the vivacious east coast city of Kota Bharu, Kelantan (July 4 to 7, 2019). As we celebrate our 30 years of networking with the neuroscience fraternity within Malaysia, and beyond, we brought to you the MSN 2019 conference theme: '30 Years From Strength to Strength' (#msnstrongertogether).

MSN 2019 drew 600 delegates, chiefly from Malaysia, and shall feature renowned international and local speakers. The focus of our scientific program was on Neurology Emergencies, an important area of clinical practice and patient care. In addition, we featured several exciting Pre-Conference workshops to enrich the learning experiences of MSN 2019 conference delegates. We are excited with the opportunities that this platform would foster, with sharing and exchange of evidence-based practices and scientific endeavours among the neurologists, physicians, emergency physicians, neurosurgeons, general practitioners, neuroscientists, medical officers, paramedics and allied health professionals.

## **OBJECTIVE**

1. This platform would foster, with sharing and exchange of evidence-based practices and scientific endeavours among the neurologists, physicians, emergency physicians, neurosurgeons, general practitioners, neuroscientists, medical officers, paramedics and allied health professionals

This two-day workshop has been carefully designed to help participants develop a systematic approach to neurological examination and diagnosis. We bring together neurology teachers from institutions across Malaysia to cover a large variety of interesting neurology cases including common postgraduate exam cases. Participants will witness first-hand how the neurologist examines and demonstrates the clinical signs on patients, with discussion of essential learning points. This Neurology Masterclass is a golden learning opportunity for medical officers, postgraduate students (MRCP/MMED) and aspiring neurology/neurosurgery/psychiatry trainees.
